TRAFFIC SAFETY PROGRAM CONTINUES HERE

In the last year, several major improvements in the parking facilities at Fermilab have been completed by Site Services and Architectural Services. Paving of the East and West parking lots at the Central Laboratory Building made last winter a lot easier for both employees' parking, and the snow removal crews. This year the Meson Area parking lot and the Central Laboratory Courtyard have been paved and marked for safer and more efficient parking. It is expected that the Proton Area roads and parking areas will be completed before winter.

During these construction times Fermilab's Site Patrol has made allowances for the severe strain on available parking space; parking regulations around the Central Laboratory have not been strictly enforced. Now that the areas are complete, and with the approach of winter, it will become necessary for motorists to follow parking regulations more closely. These regulations are intended to make parking, driving and walking safer for all concerned. Observing marked or posted "no parking" areas and speed limits is important. Also good common sense should be used in connection with parking anywhere on site.

Fermilab traffic regulations conform to those of the State of Illinois, as set forth in the publication Rules of the Road. The placement of stop signs and speed limits reflects the recommendations of a consulting Traffic Engineer coupled with changing traffic conditions. The Fermilab Site Patrol has the responsibility for monitoring compliance with traffic regulations on the site and for the issuance of citations to violators. The Traffic Safety Subcommittee plays a major role in the enforcement program. Current membership of this committee is: John Barry, Chairman, Art Greene, Chuck Marofske, Dug Pinyan, Gene Plant, Claudia Slater, Rudy Dorner (ex officio).

It is the Laboratory's policy that willful or flagrant disregard of safety regulations and procedures (including traffic regulations) is subject to disciplinary action. The enforcement procedures that have been developed include disciplinary action as follows:

Warning Citations (issued by the Site Patrol) will be reviewed by the Traffic Safety Subcommittee. Most first offense moving violations will result in a warning letter from the Chairman of the Traffic Safety Subcommittee with copies forwarded to the driver's immediate supervisor and personnel file. Second violations, and serious or flagrant first violations, will require the driver's appearance before the Traffic Safety Subcommittee. In such cases, some form of disciplinary action may be imposed.

Disciplinary actions for traffic violations will be graduated and may include the following:

- (1) A warning letter;
- (2) Required attendance at the Defensive Driving Course;
- (3) Denial of driving privileges on site or suspension of Government Vehicle Operator's Permit for an appropriate period;
- (4) Suspension without pay for an appropriate period;
- (5) In extreme cases, termination of employment or denial of the use of Laboratory facilities.

IN THE FERMILAB AREA...

...Talented people of all ages, occupations, and backgrounds are being recruited for "The Bridge Builders," a new musical organization whose activities will culminate in a World Peace Day Celebration in Song and Word in September of 1976. Rehearsals have already begun under the direction of Dr. Rosamond Brenner, 726 N. Park Blvd., Glen Ellyn, 858-5493. Call Dr. Brenner for further information.

...The first concert of the Elgin Choral Union's 29th anniversary season features "The Creation" by Joseph Haydn. The performance will be in Hemmens Auditorium, Elgin Civic Center, on Sunday, November 16, at 8 p.m. Tickets are \$4 for adults; \$2 for students and senior citizens. Other concerts to be performed this season are "Elijah" by Mendelssohn on March 7, 1976, and Mozart "Requiem" on May 16. Season tickets are available. For more information, call Bob Goodwin, Ext. 3724.

...The Snowdrifters Ski Club is holding a membership drive meeting at the Columbian Club in Batavia, November 15, at 8 p.m. Pizza, beer and a band will be part of the evening. Donations are \$6.00 per person in advance and \$6.50 at the door. The club's first trip is planned for December 12, to Michigan. For further information contact John Habermeyer, 30 W 285 Pinehurst Dr., Naperville.

HOLIDAY MUSIC JUST AHEAD

Fermilab's choir is recruiting members for holiday music activities. Rehearsals are held during the noon hour in the Auditorium. Call Barb Schluchter, Ext. 3199 for more information.

* * * * *

...Folk Dancing meets Friday, November 7 in the Village Barn - 8 p.m. Instruction provided.

* * * * *

Copies of "Fermilab Recreational Activities - Winter, 1975" are being distributed with this issue of The Village Crier. The pamphlet is designed to give visiting experimenters and employees and their families a quick reference to the many activities available at Fermilab. Extra copies and more information can be obtained from Jane Theis, CL1W, Ext. 3560.

TO PAYROLL DEPARTMENT FROM EMPLOYEE <u>Mr. Smith</u> SEC	WHAT IS YOUR "FAIR SHARE" TO CHARITY?
I HEREBY AUTHORIZE A PAYROLL DEDUCTION FOR CONTRIBUTIONS TO THE FOLLOWING CHARITIES-	Your fair share is an amount <u>you</u> determine. For some people, Fair Share means giving 1% of their annual gross income. For others, it means giving one day's pay. Payroll deduction makes it easy to act on your best impulses, to do your part without making a sacrifice.
<ol style="list-style-type: none"> <u>Easter Seals of Batavia</u> \$.50 PER WEEK <u>Geneva Community Fund</u> \$.25 PER WEEK <u>Amer. Heart Assoc.</u> " " PER WEEK 	Pledge forms for payroll deductions have been distributed to all Fermilab employees. Return your form to the Payroll Department by November 21.
SIGNED <u>Mr. Smith</u> \$.25 PER WEEK	For more information call <u>Janet Gregory</u> , Ext. 3324.
RETURN TO PAYROLL DEPARTMENT BY OCTOBER 19, 1975. DATE <u>Nov. 3, 1975</u>	
RETAIN THE ORIGINAL COPY OF THIS FORM TO THE PAYROLL DEPARTMENT BY OCTOBER 19, 1975. RETAIN THE CARBON COPY FOR YOUR RECORDS.	

SELECT FILM FESTIVAL WINNERS

A jury of six distinguished science educators has selected winners from among the 24 physical science films entered in the 11th Chicago Film Festival. A selection of these winning films will be announced at the opening of the mini festival to be held in the Fermilab Auditorium November 13-16.

Heading the jury is William B. Fowler, physicist-head of the Fermilab Superconductor group.

Other jury members are Josia Nyirenda, Science coordinator for McCosh Elementary School, Chicago; Ion Siotos, visiting physicist from Imperial College, University of London; Michael Sloan, teacher of advanced science, Glenbard West High School; Alvin Tollestrup, visiting physicist from the California Institute of Technology; Charles Vladika, art director for video, Arthur Anderson and Company, St. Charles.

The science category of this year's Chicago Festival included physics, space science, and mathematics entries. A film on weather observation, a mathematics film, two metric education films, are among the award winners on the Fermilab program on Thursday, November 13 at 8 p.m. The program is free of charge for Fermilab people and for the general public.

On Friday, November 14, the Fermilab festival program will consist of student-produced films, starting at 7 p.m. Since the Chicago Festival is the largest of its kind in the U.S. it attracts a high caliber of these innovative student films.

Saturday morning, November 15, 10 a.m. will see a repeat of the Thursday night program for the benefit of students, again without admission charge.

At 7:00 p.m. on Saturday, a short subjects program will include a prize-winning Yugoslavian film and NASA's "New View of Mars." At 9:30 p.m. the British film, "A Private Enterprise," an award winner at this year's Chicago Festival, will show. The drama explores the timeless problem of immigrants who come to work in affluent countries. An ambitious young engineer from Bombay is frustrated in attempts to start a small factory, angered by an arranged engagement, with many obstacles to be overcome.

On Sunday afternoon at 2 p.m. a collection of children's films from such countries as France and Iran will be offered.

The four-day film show offers a bargain in entertainment at lower prices and transportation costs than attending the Festival in Chicago.

...Science Film Jury: (L-R) Back Row: J. Siotos, M. Sloan, C. Vladika. (Center) J. Nyirenda, W. Fowler. (Seated) A. Tollestrup.

FILM FESTIVAL SCHEDULE

<u>Thursday, November 13</u>	8:00 p.m.	Science films
<u>Friday, November 14</u>	7:00 p.m.	Short subjects
<u>Saturday, November 15</u>	10:00 a.m.	Repeat of science films
	7:00 p.m.	Films produced by students
	9:30 p.m.	Feature film
<u>Sunday, November 16</u>	2:00 p.m.	Children's films

FTS 10-7 CONVERSION

A new system for FTS On-Net calling will go into effect on December 1, 1975. It is the "10-7 Conversion." This is a dialing system where a new scheme of seven digits does the work of the present ten digits in FTS On-Net direct dialed calls. A 15-minute program on November 14 at 11 a.m. or 1 p.m. in the Auditorium will give the details.

Most FTS calling numbers will change as of December 1. New FTS directories will be distributed at these sessions.

Plan to attend the meeting. This change will affect all FTS users.

WATCH FOR...

...The Music Club's turkey raffle. Tickets will go on sale Friday, November 7. They will sell for 25¢ each for two hen turkeys and two tom turkeys to be raffled at 12:00 on Thursday, November 20. Proceeds for the benefit of Music Club activities.

...An exhibit of Blindskills products to be offered on the west side of the Fermilab Cafeteria on Wednesday, November 12 starting at 7:00 a.m.

RADIATION PHYSICS REMINDS YOU...that film badges should be exchanged on the first day of each month. Permanent badges can be exchanged at the permanent badge racks; temporary badges can be picked up at Radiation Physics, CL 7E or in the field at temporary badge boxes, leaving an old one when picking up a new one. For further information call Larry Coulson, Ext. 3023.
