## CENTRAL LABORATORY CAFETERIA SERVICE BEGINS

...Sal Cuomo, Food Services Manager, Mae Riggs (L), Helen Thompson and their official welcome to new cafeteria...

...Looking from new dining area through atrium in lobby to front Main Entrance of NAL Central Laboratory Building...

While the giant NAL accelerator whirled  $5 \times 10^{12}$  protons 200,000 miles every second around the 4-mile ring, the Laboratory last week took a major step toward providing some of the conveniences which help to create a proper climate for research at NAL. The opening of the permanent cafeteria at the Central Laboratory Building heralds the beginning of a social atmosphere that has been a major goal of Laboratory development. The 16-story structure was designed to be the nerve center of the Laboratory. During the construction period, the sense of "community" where ideas, plans, and personal exchanges combine into the morale that is sometimes the basis of new discoveries, has been eagerly awaited.

The cafeteria of the Central Laboratory building is located in the heart of the building on the southeast corner of the main entrance level. The serving area overlooks the main accelerator; the arched cooling water sprays are clearly visible here. The dining area lies between the atrium of the main lobby and the glass wall opening to the roof of the adjoining auditorium building. The present table arrangement seats 260 people, but this will expand as tables are added.

More than 250 customers showed up for the opening day at the new area after NAL Director Robert R. Wilson cut the official ribbon marking the start of service. The cafeteria staff put forth an all-out effort, seasoning the shiny new grills, cleansing and polishing the tables and bright yellow counters, producing ample evidence of the pleasant service now beginning.

It is possible to imagine that before long an atmosphere could emerge in the new surroundings much like that described by Victor Weisskopf in his book "Physics in the 20th Century," speaking of the famous Niels Bohr period of the Institute for Theoretical Physics in Copenhagen:

*"Bohr found a new way of working. He did not work as an individual alone; he worked in collaboration with others...In lively discussions, in groups of two or more, the deepest problems of the structure of matter were brought to light. We see him, the greatest among his colleagues, acting, talking, living as an equal in a group of young, optimistic, jocular, enthusiastic people, approaching the deepest riddles of nature with a spirit of attack, a spirit of freedom from conventional bonds, and a spirit of joy that can hardly be described...Bohr and his men touched the nerve of the universe. The intellectual eye of man was opened to the inner workings of Nature that were a secret up to this point..."*

CAFETERIA OPENS (Continued)

...Cafeteria committee, L-R: R. Carrigan, L. Teng, J. Campbell, T. Nash. (T. Kirk missing)...

...Looking toward serving area of new Central Laboratory Cafeteria on opening day, November 1st...

Construction is reaching final stages in the main lobby of the NAL Central Laboratory Building. Workmen are planting a wide variety of trees and other greenery in the brick planters there. Looking up, crossways at both ends of the building catch the eye and carry the sweeping view up to the skylight at the top of the sixteen story lobby.

Permanent equipment is being installed in the food preparation area one floor below the Cafeteria serving lines. The end of 1973 will find the food service area close to their final state, hosting employees and visitors many hours a day. The Village Cafeteria will operate on a somewhat limited scale as the focus of the Laboratory shifts to the Central Laboratory area.

Present hours and service offered in the Central Laboratory Cafeteria are:

	<u>BREAKFAST</u>	<u>LUNCH</u>	<u>DINNER</u>
Monday thru Friday --	7:30 to 9:30 a.m.	11:30 a.m. to 1:30 p.m.	5:00 to 9:30 p.m.
Saturday and Sunday -	8:00 to 9:30 a.m.	11:30 a.m. to 2:00 p.m.	No dinner service

A variety of hot and cold sandwiches is available at lunch and dinner. Several entrees and accompaniments are offered on the hot line. Beverages, soft ice cream, and the popular scoop ice creams are served in the center island. Variations of these offerings will occur as completion of new facilities permits.

Frozen dinners and sandwiches are now available in the Cross Gallery during the owl shift. The Duty Assistant in the Control Room has a key to the Cross Gallery Kitchen where a microwave oven is installed for preparing these foods. Dinners vary somewhat in price and are typically around \$1.50 each.

IN MEMORIAM

LEO JOHN KOZIOL

Leo John Koziol, Instrument Welder in the NAL Machine Shop, died at Copley Memorial Hospital, Aurora, on Saturday, November 3, 1973, after a short illness. He resided in Sugar Grove, Illinois.

Leo was born in Chicago and attended technical training schools in Chicago and Hammond, Indiana. He started work at NAL in November, 1968, one of the first welders to do experimental work on the Main Ring magnets when the NAL welding shop was in the Experimental Boiling Water Reactor Building at the Argonne National Laboratory.

Leo John Koziol

"Leo was always considered to be the 'old expert' of the welding department. When other welders came upon unfamiliar or difficult welding problems, Leo frequently had the answer," according to Bill Jones, head of the NAL Machine Shop.

Koziol is survived by his wife, Antoinette; a son, Leo B., and his wife and two grandsons of Livonia, Michigan; and a step-son, Richard Zych, who works in the NAL Receiving Department and who lives at home. Funeral services were held Tuesday, November 6, with burial at Lincoln Memorial Park, Aurora.

SATURDAY NIGHT FUN

The motorized mirror ball set the pace for the '20's fun at Speakeasy Night, Saturday, October 27 in The Village Barn. An electronic eye answered the "Joe Sent Me" inquiries, and a Dixie-land Band set the lively pace for the evening...

...NALREC Chairman for the party, Helen Ecker, swings with Gene Stark...

...Village Barn decorated with bubbles, baubles and beads...

...Jack Johnson, sausage 'n cheese counter...

Jean and Bill Froemming

Bill and Liz Foster

**WANTED**

**150 HEALTHY, WILLING VOLUNTEERS FOR  
BLOOD DONATION DAY**

**MONDAY, NOVEMBER 12**

NAL's coverage for all employees is in serious jeopardy -- 200 pints are needed, only 60 donors have signed up or contributed.

Call it insurance against a tragedy, if you like, but don't put it off. Any member of your family over 18 may contribute on your behalf.

# THE INTER/NATIONAL FILM SOCIETY

PRESENTS

**Village Barn**  
**8:00 \$1.**  
**Friday, Nov. 9**

**EL** Mexico/1952  
A film by Luis Bunuel,  
Master of Surrealist  
Cinema and Enemy of  
The Hypocrisies of  
Church and Society  
Other films by  
Luis Bunuel  
include:  
The Discreet Charm of the Bourgeoisie,  
Viridiana, The Exterminating Angel,  
Los Olvidados and Tristana.  
BUNUEL'S Symbolism cannot be analyzed  
in terms of Good or Bad for it contains, in  
addition to any obvious meanings, everything  
that the viewer may read into it.

## NEW NAL AERIAL PHOTOS AVAILABLE

As a result of a suggestion made at a recent meeting of The Committee, large black and white aerial photographs of the NAL site are now available for purchase at the Public Information Office, 18 Sauk. The photograph was taken on September 9, 1973, measures about 40 inches square, and sells for \$2.00. There is a limited supply on hand and orders may be taken.

## NOTE TO NAL EMPLOYEES

Eola Road is now open to NAL employees from 7 to 9 a.m., and 4 to 6 p.m. This is reported to be helpful in avoiding the problems on Highway 59, south of Batavia Road.

\* \* \* \* \*

## NAL'S DANCING FEET

International Folk Dancing meets the first and third Fridays of each month at 8 p.m. in The Village Barn. People are free to listen, watch, try what they like. Dances in circles and lines. Teenage children enjoy this style. For further information, call Marilyn Griffin, 584-2801.
