## NALREC'S FAMILY PICNIC

For Fermilab, visiting experimenters, ERDA, MM & MSI employees and families.

SUNDAY - AUGUST 15

11 a.m. to 5 p.m.

VILLAGE RECREATION AREA

- 11:00 Opening
- 11:30 Food Service Begins  
First door prize awarded  
Clowns (until 2 p.m.)
- 12:00 Door prize
- Noon
- 12:30 Door prize
- 1:00 Door prize  
Teen Town opens  
(Solid Crystal playing)
- 1:30 Door prize
- 2:00 Door prize  
Games begin
- 3:30 Food Service ends
- 4:00 Door prize
- 4:30 Door prize
- 5:00 Last door prize  
Picnic ends

- Four complimentary food tickets each employee's family member  
Add'l. 10¢ each available at picnic.
- Hamburgers, hot dogs, popcorn, cotton candy, and more (four food lines!)
- RIDES - 25¢/ticket - ferris wheel, helicopter, moonwalk & frolic. Purchase at picnic.
- GAMES for kids and adults - starting at 2 p.m.
- BALLOONS for the kids.
- CLOWNS - until 2 p.m. (Geneva Fire Dept. Clown Club).
- MUSIC FOR TEENS 1 to 4 p.m. - Village Barn.

\*\*VOLUNTEER HELP NEEDED\*\*

NALREC Picnic Committee: Chuck Grozis, Liz Foster, chairmen; Mary Luba, Keith Schuh, Don Sorenson, Barb Schluchter, Dennis Borree, Ed LaVallie, Jesse Guerra.

SUMMER STUDENT PROGRAM ENDS AUGUST 20

Eighteen of Fermilab's summer student employees will return to their campuses on August 20, at the end of the Laboratory's seventh program for support of minority participation in physics. With only one exception they have come from the southern tier of United States to learn about and to work at one of the world's major research facilities. The men and women attend Alabama A&M University, Normal, Alabama; Indiana University at Bloomington, Indiana; Jackson State University, Jackson, Mississippi; New Mexico Highlands University, Las Vegas, New Mexico; New Mexico State University, Las Cruces, N.M.; Northern Arizona University, Flagstaff, Ariz.; North Carolina A&T University, Greensboro, N.C.; Norfolk State College, Norfolk, VA.; Southern University, Baton Rouge, LA.; University of Texas at El Paso; Virginia State College, Petersburg, VA.

Of the more than 95 of these students who have participated in Fermilab's program in the past seven summers, 30% are now in graduate school, 19% are continuing undergraduate education. Another 10% have become scientists, technicians, or teachers. About 8% have gone into other careers.

The summer program benefits the students, the Laboratory, and the home institutions from which the students come, Dr. Francis T. Cole, chairman of the summer program advisory committee, reports. "Case histories for several schools can give some feeling for the success of the program," Dr. Cole feels. "New Mexico Highlands, a basically Chicano school in Northeast New Mexico, has sent ten students to the Fermilab summer program. Six of these students are now in graduate school, two of them in nuclear chemistry, three in math, and one in physics.

"We have always wanted to educate students in the possibilities of research and not to narrow this only to physics. Thus we regard any interest in graduate school as a plus for the program. Of the New Mexico Highlands students who did not go to graduate school, one has gone on to a teaching career in physics and two are presently undergraduates. Dr. Vincente Llamas, Chairman of the Department at New Mexico Highlands, reports that most of the students who have participated in the program have been strongly influenced in their final degree choice and eventual career decision by the program."

...Freda Gibbs...  
(Meson Detector Bldg.)

...Melvin Jones...  
(Research Services)

...Aaron Day...  
(Physics Dept.)

...Gerald Sigers...  
(Accelerator Support Group)

...Jim Davenport, Summer Program Coordinator  
and Frank Cole, Chairman, Advisory Committee

...Marshall Joy...  
(Control Room, Accel. Group)

...Linda Flores...  
(Physics Dept.)

...Gwen Dixon (Magnet Facility)  
and Warren Cannon (EEO)...

...Henry Mulvaney...  
(Linac)

...Joe Prieto...  
(Superconductor)

INTER/NATIONAL FILM SOCIETY

presents

BLOW-UP (1966)

Director: Michelangelo Antonioni

Cast: David Hemmings, Vanessa Redgrave,  
Sarah Miles, Peter Bowles.

Taken from a short story by Julio Cortazar

8 p.m. - Auditorium \$1.50 adults

One picture is worth many a frustration in this, Antonioni's most popularly successful and eventful film. David Hemmings stars as a fashion photographer who accidentally shoots what might be a murder, or merely his imagination. In his obsession to know the truth he enlarges and re-enlarges the picture. The film's suspense mounts with each darkroom session, culminating in an inconclusive resolution that leaves the viewer sharing Hemmings' uncertainty.

Antonioni treats the subject naturally, without the mannerisms seen in his earlier works. The pace is fast, the effect one of elegant spontaneity; color, brilliant and sometimes bizarre, drenches the sets. Intermingled with the action are perceptive shots of London and its life (much of the liveliness generated by Vanessa Redgrave and others of that ilk). Despite some attempts at avant-gardism and a pervasive use of symbol and implication, *Blow-Up* is primarily a mystery story that keeps its secret to the end.

THIS AND THAT...

...Residents of the Fermilab Village are reminded that apartment-style mail boxes are now available for Village residents in the vending house at 18 Sauk Boulevard. For information on delivery and pick up schedules, and mail procedures generally, call Carolyn Hines, Ext. 3788.

...SOVIET LIFE, the magazine circulated in the United States by reciprocal agreement between the governments of the U.S. and the U.S.S.R., is now available in the Fermilab Library, CL-3Crossover. The magazine is somewhat similar to the style of LIFE Magazine published in the United States and contains articles on Soviet economics, science, education, literature, sports, with many photographs and illustrations.

...The Volleyball League plays Mondays, Wednesdays, and Fridays at 5 p.m. at the Village Barn. Spectators are welcome. At the half-way point in the current tournament in first place is the Main Ring Power Supply team. Second, Team 4 (R.M. Electronics); third, Ace Hitters.

...HATHA (Health) Yoga for Every-Body! - men as well as women...free lecture and demonstration Tuesday, September 7 from 12 noon to 1 p.m. in the Auditorium. Yoga will help the out-of-shape person of any age get launched on a program of rejuvenation.

MORE SWINE FLU NEWS

The DuPage County Health Department has notified community leaders in the area that its August-September schedule for communitywide inoculation for "swine flu" has been cancelled. Dates for a new schedule -- expected to be in late September and early October -- will be announced. It will be carried out in two phases. Phase I will reach people over 65 years of age and those under 65 with chronic illnesses. Phase II will provide inoculation for the general population.

The "swine flu" virus was isolated during a respiratory illness outbreak at Fort Dix, New Jersey and re-identified as the swine flu virus first seen in the 1930's. Its symptoms and side effects are serious enough that a nationwide effort is underway to avert a possible epidemic in the United States. Everyone participating in the coming inoculations must sign a consent form and children under 18 must have parental consent for the inoculation.
