NAL MAIN ENTRANCE FORMALLY OPENED

...E.L. Goldwasser (L) provided scissors for Mayor Robert Brown of Batavia at Sunday's ceremony...

...Mayor Brown officially opened the new NAL Main Entrance Road by snipping the colored ribbon...

Mayor Robert Brown of Batavia cut the ribbon opening the new Main Entrance Road to NAL Sunday afternoon, September 9. Mayor Brown was introduced by Dr. Edwin L. Goldwasser, Deputy Director of the Laboratory, who noted that NAL and Batavia officials have been meeting for six years on areas of common concern. "It seemed natural for us to have our main entrance at this location, opposite Batavia, and we hope Batavia residents will be visiting us often," he said.

Dr. Goldwasser promised Mayor Brown a souvenir pair of scissors as a token of the event keynoting the formal opening of the new access to communities to the west of the Laboratory.

Mayor Brown expressed appreciation for the opportunity of Batavia officials to visit NAL. Aldermen, park and school board members joined the Accelerator Division's picnic earlier in the afternoon and were given a tour of the Laboratory after the ceremony.

First to use the new road officially were about 50 bicyclists who had lined up opposite the ribbon. Many were employees and their families who live in Batavia and who will be able to take advantage of the new access road to bike to the Laboratory. At the right side of each lane, a bike path has been marked off by a double yellow line. More than 400 of NAL's employees are now headquartered in the Cross Gallery and Central Laboratory buildings. Coming to work via Kirk Road will be a real time saver for many of these people, as well as for those still located in the Village.

The road was planned to take full advantage of the beauty of "Big Woods," a virgin forest on this part of the NAL site. By dividing the road into two lanes -- one for entrance, the

NAL MAIN ENTRANCE (Continued)

...About 50 bicyclists formally opened the new road as they rode in a caravan from Kirk Road toward the Central Laboratory area earning the brass medallion at center...

other for exit -- a winding path through the trees was created ending with the reflecting fire pond and its attractive view of the Central Laboratory building just outside the forest.

In the next few months, as administration of the Laboratory becomes centered in the Central Laboratory building, visitors' access to NAL will undoubtedly shift toward the Kirk Road entrance. Its location, about 3 miles north of the East-West Tollway, gives quick, easy access to O'Hare Airport as well as to the major cross-country freeways. This convenience is becoming more and more important to the several hundred experimenters who now visit NAL regularly.

...Extending a mile east from Kirk Road, the new NAL Main Entrance Road brings employees and visitors quickly and easily to the Central Laboratory area...

ACCELERATOR DIVISION PICNIC

Members of NAL's Accelerator Division, their families and a number of the Division's closest associates and their families, picnicked together to celebrate the new NAL intensity record set by the Division on August 8.

Before marshalling the effort that will bring the next milestone on the NAL machine, the congenial group enjoyed a day of fun, food and fellowship. Buffalo meat in three versions was served, a bluegrass band prompted clapping hands and tapping feet. Square dancing in The Village Barn, baseball, volleyball, and horseshoes rounded out the prairie-style program that proved again to be the style many employees enjoy.

Don Richied, chairman of the planning committee, ended the day by extending his sincere thanks to all who helped and participated, such as Dennis Curl and others on the all-night roasting vigil. "I think everyone's desire to have a good time cleared the skies," he said.

NAL will miss two colleagues departing from the Laboratory this week. Enjoying the Accelerator Division picnic Sunday was (in photo at left) Fred Mattmueller (front right, dancing with wife Anne). He has moved from manager of the Batavia AEC office to deputy manager of the AEC Chicago Operations Office, located at the Argonne National Laboratory. In the photo at right, M. Popov, Soviet experimenter (front right), joined the square dancing Sunday. He and his group will return soon to the Soviet Union, upon completion of their work at NAL...

THE
INTERNATIONAL
FILM SOCIETY

PERSONA

a film by Ingmar Bergman
Friday, September 14 - 8:00 P.M.

Village Barn

One of the world's greatest writer-directors, Bergman's searching studies of good and evil and the inter-mixings of personalities and ideals make his films among the most popular in the world. "Persona" received Best Picture and Best Actress awards in 1966-67. It is the story of a great actress and her nurse-companion and a dramatic weaving of their separate identities.

ADMISSION - \$1.00

STORES CATALOG NOW AVAILABLE

Copies of the new catalog of NAL stores' supplies is now available in the Village stock room and the Cross Gallery stock room. Customers may place their names on a permanent mailing list to receive supplements and revisions to the catalog. For further information, call Material Supply Services, Ext. 3585.
