## PLAN TO CLOSE WILSON ROAD ON NAL SITE

More than a year ago, NAL announced its intention to close Wilson Road -- which runs East and West at the northern end of the 6,800-acre site -- to the general public, on October 1, 1970. That date is now approaching and the Laboratory is making plans to close this road.

Last week, the Laboratory sent letters to Mayor Brown, Batavia; Mayor Downs, West Chicago, and Mayor Stafford, Warrenville, advising them of the Laboratory's plans.

The Laboratory's intention is to operate Wilson Road on the same basis on which it operates Batavia Road -- namely, it will be closed to the public only from 8:00 p.m. to 6:00 a.m. At other hours, the road will be available at the driver's own risk.

Robert R. Wilson, NAL Director, notified the mayors of the adjoining suburbs that it now appears that NAL actually will have to cut Wilson Road to build NAL facilities, especially those associated with the Laboratory's experimental areas, within the next six months or by next Spring. The need to close Wilson Road more quickly than that has to do with vandalism on the site.

NAL recently has been suffering from vandalism along the roads through the site. The Laboratory has developed plans for use of many of the existing farm houses, barns and out-buildings which were purchased by the State of Illinois and presented to the U.S. Government through the U.S. Atomic Energy Commission.

The vandalism which has occurred represents a serious loss to the AEC and, therefore, to the general public; only last week a barn was burned down early one morning, and apparently the fire was set by vandals. NAL feels that it can only protect this property by closing Wilson Road on the NAL site.

It is the Laboratory's hope that by the time that Wilson Road is cut permanently the extension of Kirk Road and Averill-Barton Roads will be completed.

No matter what, however, it appears that there is now no way for Wilson Road to remain a public thoroughfare on any long-range basis.

Rudy Dorner, Site Management, is developing plans for guard services to establish plans for controlled access to the site after hours on both Batavia and Wilson Roads.

**MARK YOUR CALENDAR:** The second annual Halloween "Costume Capers" will be held Saturday, October 24, at 8:00 p.m. in the NAL Village Barn.

## DR. SAMUEL BRADEN NAMED TO UNIVERSITY SITE STUDY GROUP

A fifth member has been added by the Illinois Board of Higher Education to the Technical Advisory Committee which will study the possibility of setting up a new major public university near NAL. He is Dr. Samuel Braden, an economist on the faculty of Indiana University who formerly was chancellor of Illinois State University at Normal.

Dr. Boyd Keenan, a member of the IBHE staff, said the committee held its first meeting Monday, September 21. Other members of the committee are Dr. Paul Chenea, Vice-President for Research, General Motors Corporation; Dr. Fred H. Harrington, President, the University of Wisconsin; Dr. Donald F. Jornig, President, Brown University; and Dr. Frederick D. Rossini, Vice-President for Research, University of Notre Dame. The committee is scheduled to issue its report in early 1971.

## NAL JOINS IN BUSINESS OPPORTUNITY FAIR

Eight members of NAL's Equal Opportunity, Purchasing and Contracting staffs took part for the second consecutive year in the annual Chicago Business Opportunity Fair at Navy Pier in Chicago recently. During the three-day fair, minority businessmen displayed their products and services for major businesses and buyers in the metropolitan area. NAL staff members who attended the Fair to seek possible suppliers and contractors included Kennard Williams, Warren Cannon, Michael Hardy and Roy Rodriguez, of the Equal Opportunity staff; Richard Auskalnis, Alvin Atkins, Willard Kautz and David Sullivan, of the Purchasing-Contracts staff.

....An orientation tour for NAL's female personnel to brief them on construction progress and plans for the permanent site was held Monday, September 14. Thirty-seven ladies joined the tour, arranged by Doris Ferrell, which included a one-hour visit to the Linac, Booster and Main-Ring areas. Donald Getz, Assistant Laboratory Director, (center above) led the tour. The above photo was taken during the tour....

#### MORE ADDITIONS TO NAL FAMILIES

A boy, Gregory Mark, 7 lbs., 6½ oz., born to Mark and Karen Kibilko on August 26th. Mark is with Main Ring.

A boy, William Patrick, for Michael and Sherrol Shea, on August 26th. Michael is a member of the Booster Section.

A girl, Margette, born August 2nd to Larry and Sylvia Chiplis, 8 lbs., 4 oz. Larry works in the Machine Shop.

David, 7 lbs., 5 oz., son of Dave and Marie Sullivan, born August 4th. Dave Sr. works in Contracts.

Michael Mark, 7 lbs., 12 oz., son of Janice and Harlan Gerzevske, born August 14th. Harlan is in Booster.

Ed and Dawsie Gallagher became the proud parents of twin girls, Katey and Karol, on June 28th. (The Gallaghers have four sons ranging in age from 5 to 10 years.) Ed is assigned to NAL's Plant Management.

Bob and Mary Jensen are the proud parents of a baby girl, Annissa Deanne. Annissa weighed 7lbs., 3½ oz., and arrived on August 23rd. Bob is in the Booster Section.

Timothy Topolski was born on August 22 to Donna and Tom Topolski. Tim weighed in at an even 5 lbs. Tom is with the Booster Section.

Louis and Estelle Clavelli were the proud parents of a baby girl, Anne Marie, on August 28. Anne weighed 6 lbs., 11 oz. Louis works in Theoretical Physics.

**HAPPY HOUR:** The next "Happy Hour" for NAL and DUSAF employees will be held in the NAL Village Barn on Tuesday, September 29, beginning at 5:00 p.m. and ending at 6:30 p.m.

## IT'S TIME TO WINTERIZE

Now that Labor Day has passed and thoughts of preparing for Winter again run through our minds, the NAL Maintenance Department has prepared a list of "tips on winter care for your car."

The list was developed by George Doyle on the basis of the causes of the emergency calls to which his staff members responded during the cold, snowy days of last Winter. It is not too early to get your car winterized, Doyle suggests. His list follows.

1. Have new points, condenser and plugs installed and timed.
2. Check spark plug wires for shorting out.
3. Fix radiator if leaking or clean with a cleaner.
4. Check if water pump is working properly.
5. Have radiator cap checked.
6. Make sure hoses are in good condition and that the clamps are tight.
7. Add antifreeze with rust inhibitor, tested to about 25 below zero.
8. Check belts on fan and generator, or alternator. This is the cause of about 25% of rundown batteries in winter use.
9. Battery, if old, or will not hold full charge overnight, it is time to invest in a new one.
10. Make sure battery connectors are clean and tight.
11. Have automatic choke checked. This is very important.
12. Have a carburetor check.
13. Install snow tires. Also, balance same.
14. Run your car for a few minutes with lights, heater and radio off before putting it away for the night. This will give your battery time to charge for a better start in the cold morning.
