

FermiNews Is Back

As the new Editor of the Publications Office, I am pleased to announce that *FermiNews* is again up and running and ready for your story ideas. *FermiNews* experienced an interrupted publication schedule due to the resignation of former Senior Editor, Rick Fenner, who left Fermilab last January in order to join the staff at Argonne National Laboratory as a science writer.

Since my recent arrival on the Fermilab scene, I have talked with several employees regarding the types of articles they would like to read in *FermiNews* and any format suggestions they might have. Through these conversations, I have received many fine ideas. One such suggestion came from Stephanie Novack, Editorial Assistant, Publications Office. Stephanie suggested that we add a column which she entitled, *Applause Applause*. This new column, seen in this issue, will highlight employees' achievements and recognitions received for their work at the Laboratory, in their communities or in other organizations.

Last week, all department heads and other frequent contributors to *FermiNews* received forms for submitting articles and story ideas to the Publications Office. Please share this information with your colleagues.

For those of you who have articles to submit or ideas to share, please visit the Publications Office (WH6NW), or write us at MS. 107 or call ext. 3278. I look forward to working with all of you in the future and to continued reader input.

-- Cindy Crego, editor.

BEAM FEVER

I must go down to the Lab again, to the lonely ponds and the sky,
And all I ask is a steady beam and a magnet to steer her by;
And the RF kick and the Klaxon's song and the flat roof's leaking,
And a gray mist on the prairie's face, and an orange dawn
streaking.

I must go down to the beam again, for the call of the running time
Is a wild call and a clear call that may not be denied;
And all I ask is a windy day with the white clouds flying,
And the hadron spray and a blown fuse, and the Canada geese
crying.

I must go down to the beam again, to the vagrant Gypsy life,
To the duck's way and the buffalo's way where the wind's like a
whetted knife;
And all I ask is a merry yarn from a laughing fellow-user,
And a quiet shift and a sweet dream and a Macintosh computer.

APPLE ANNOUNCES HARDWARE WARRANTY

Apple Computer has announced a new Apple One-Year Hardware Warranty. The new warranty provides one full year of global coverage on all Apple hardware products. This warranty is retroactive to the date of purchase, if the product was purchased after January 1, 1990.

The PC Carry-In facility at the Feynman Computing Center is an Apple warranty repair station for lab owned Apple PCs. If you have an Apple Macintosh product purchased after January 1, 1990, please keep the purchase order numbers, as well as the date the equipment was received on file in your location. In the event your Apple PC needs service, we will need the purchase information when we forward the defective module or drive to Apple for warranty verification.

Arts and Lecture Series

1990 Summer Programs

The Fermilab Arts and Lecture Series is ready for summer to arrive! An instrumental showcase, folk music, jazz and topical lectures have been planned to complement the joy of summer activities. All programs begin at 8 p.m. and conclude with a reception allowing audience members to meet the evening's artists.

Poland's High Wire Act: Balancing Political Reform and Economic "Shock Therapy."

May 4 — admission \$2.

The eyes of the world have been on Poland for the last decade, watching that country's exhilarating but dangerous flight from communism to democracy and its dizzying attempt to transform its economy from a centrally-planned to a fully market-oriented one. Mr. Tom Sneeringer and Mrs. Eva Wierzynaks, staff assistants to Congressman Dan Rostenkowski, bring Poland's struggle to life in their lecture.

What Will Replace the Cold War? June 1 — admission \$2.

The people's revolution in Eastern Europe has clearly exposed the failings of communism and ended the Cold War. But the past four decades also have had anti-democratic results in the West and Third World which must be confronted if we are to take advantage of this incredible opportunity to fashion a better world. Mr. Len Ackland, Editor of the *Bulletin of the Atomic Scientist*, addresses these issues in his talk.

Slide Into Summer! June 16 — admission \$11.

Slide into Summer!, not at home plate, but at an unusual musical program showcasing the slide trombone. Under the direction of the Chicago Symphony's principal trombonist, Jay Friedman, The Chicago Trombones join forces with the king of jazz trombone, Mr. Bill Watrous, to demonstrate the unique sounds that this noble instrument is capable of creating. You have to hear it to believe it.

Jazz trombonist, Bill Watrous appearing June 16, in Fermilab's Ramsey Auditorium.

Folk Showcase July 21 — admission \$8.

Refresh yourself from the dog days of summer with the performances of Garnet Rogers and the Priscilla Herdman/Anne Hills/Cindy Mansen Trio at Fermilab's annual Folk Showcase. Priscilla, Anne and Cindy are among three of the most beautiful women's voices in folk music, whose fine harmonies give a new sound to both traditional and contemporary songs. Garnet Rogers has been described as Canada's greatest songfinder, a charismatic performer, a powerful singer and one of folk music's finest interpreters. For this performance, the audience is asked to bring donations of canned food items for the Fox Valley Area food banks.

Toshiko Akiyoshi and Lew Tabackin Jazz Quartet

August 11 — admission \$10.

It's a night to revel in the jazz artistry of the Toshiko Akiyoshi and Lew Tabackin Jazz Quartet. They're husband and wife, and a jazz combination to be reckoned with! Toshiko Akiyoshi is considered one of today's top jazz piano artists, and Lew Tabackin's flute and saxophone playing has been touted with superlatives of all sorts.

For further information and ticket reservations, call Fermilab's box office at 840-ARTS weekdays, between 10:00 a.m. and 12:00 noon and 1:00 and 4:00 p.m. — *Tammey Kikta*

Applause Applause Applause Applause

"J.P." Morgan Award Recipient

Joe "J.P." Morgan, Senior Purchasing Administrator, Purchasing Department received an "Outstanding Buyer" award at the 12th annual *Share the Success Awards* Presentation sponsored by the Minority Business Subcouncil of the Chicago Regional Purchasing Council. This award is given annually to the 10 outstanding buyers in the Chicago area, who have during the past year, supported the minority business program by their extra efforts. The award was presented at the Chicago Hilton, Chicago, Illinois, on April 17.

J.P. credits his success in minority purchasing to the commitment and mandate made by Fermilab which, he emphasizes, has a "distinguished record in furthering minority enterprises." In accepting this award, J.P. stated, "My accomplishments in minority purchasing are a reflection of Fermilab's commitment at all levels of management, particularly that of Dick Auskalis, procurement manager. The entire staff of Fermi's Purchasing Department is totally committed to supporting minority business."

Prior to his promotion to Senior Purchasing Administrator, Morgan worked for 16 years as purchasing administrator. In this position his responsibilities included purchasing electronic components for the Laboratory. J.P.'s impressive career in the field of purchasing also includes holding the position of purchasing agent for the Illinois State Toll Highway Authority, as well as serving in the same role for Motorola's Automotive Products Division.

LASENBY ACCEPTS AWARD

James Lasenby, Senior Personnel Administrator, Employment Office, recently accepted on behalf of Fermilab an award conferred by the College of DuPage. The award recognized Fermilab as its 500th Cooperative Education Employer. The award was presented by Representative Harris Fawell at a recognition ceremony held at the College of DuPage, March 16, 1990.

*Congratulations to **Alma Karas** on attaining the rank of American Contract Bridge League Life Master. Alma has been an employee at Fermilab for 10 years and works in the Contracts Department. Stated Alma, "I owe this recognition to talented and patient partners."*

*The above pictured Fermilab employees have been awarded plaques by the Heartland Blood Center in Aurora for their generous donations. Plaques are awarded to those individuals who have given in "gallon" quantities. Pictured are: (first row, l. to r.), **Richard Hauser, Roy Jeffries, John Hissong**; (second row, l. to r.), **Bob Haring, William Waitkoss, Bill Merz.***

Activities Office

POOL OPENS

The Fermilab swimming pool, located in the Village behind Kuhn Barn, will be opening on Memorial Day weekend. The pool is open seven days a week, from noon to 9 p.m. on weekdays and from 9 a.m. to 9 p.m. on weekends and holidays. Single, couple and family pool memberships are available. Swimming lessons for children are also offered.

DAY CAMP

If you are looking for a fun-filled day care alternative for the summer months ahead, consider Fermilab's Day Camp. Fermilab sponsors three supervised Day Camp Sessions. Children who have completed 1st through 6th grades (ages 7-12) are eligible.

Both Day Camp and the swimming pool are open to employees, visitors and eligible Fermilab contractors. Registration forms for pool memberships, swim lessons and Day Camp have been mailed. If you did not receive these forms and are interested in any of the programs, stop by the Activities Office (WH1E). If you have further questions, contact **Jean Guyer**, X3126. -- *Jean Guyer*

Congratulations to:

Kelly Chapman and **T. J. Sarlina** (RD/Safety) on the birth of Megan Marie, on December 15, 1989, at 2:35 p.m. Megan Marie weighed 7 lbs. and was 19-1/2" long. She has a sister, Kelly, and a brother, John Thomas.

Wellness Works

Fermilab's Fourth Annual Walk/Jog Event on the Main Ring Road is scheduled for Wednesday, May 16, from noon to 1:00 p.m. The rain date is Thursday, May 17.

This is a non-competitive event where participants go at their own pace. A blue ribbon will be awarded to each employee who completes the 2.0 mile course. Everyone's "stamped" participation card will be entered into a raffle. Five Fermilab headbands will be awarded and the grand prize winner will be able to choose either a single pool pass or a single membership for one year at the Fermilab gym.

New this year, each employee who participates will be given a ticket for a complimentary piece of fruit or a single size serving of frozen yogurt to be redeemed in the cafeteria during lunchtime or at break on the afternoon of May 16.

Pre-registration is suggested for this event and can be made by calling Dotti at ext. 4367 — *Dotti Swanson*

Library News

In the Library...A GIVE-AWAY: ATSM (American Society for Testing & Materials) set of standards for 1980 and 1984. The Library now has the 1988 edition.

Would you like to receive regularly updated lists of publications on a research topic of ongoing interest? A search profile can be set up to run in online databases and electronically transmitted to your Vax account. For more information: Contact Paula Garrett, WH3X, FNAL::LIBRARY, ext. 3401. -- *Paula Garrett*

FIRE EXTINGUISHER CLASSES OFFERED

As the warmer weather approaches and outdoor activities become more comfortable, the Fermilab Fire Department is once again offering fire extinguisher classes. There are about 1500 fire extinguishers in place around the site. If properly used during a fire, they could save your workplace. If improperly used, they are not only ineffective, but they could become a life hazard to the inexperienced user.

Extinguisher classes are scheduled at your convenience for a group of six or more and consist of a short talk on personal safety followed by a "hands on" experience of extinguishing an actual fire. These entertaining and informative sessions are held across the street from the fire station. Call ext. 3428 to schedule your class. — *Fred Cload*

In Memoriam

Helen Fearnley

1929-1990

Helen Fearnley, Fermilab I.D. #1430, passed away on January 26, 1990.

Mrs. Fearnley, who retired in April 1988, had been in the Fermilab Procurement Group since September 1971, having come to Fermilab from Argonne National Laboratory. She is survived by her husband, Donald J. (retired Fermilab PREP Group employee), two sons and three grandchildren.

Benefit Notes

Since the last issue of *FermiNews*, several changes were made to Fermilab's benefit plans that I would like to summarize, just in case you may not have read about the changes when they were announced.

MAMMOGRAPHY COVERED UNDER CONNECTICUT GENERAL

Once again, Fermilab made arrangements to have a mobile mammography unit brought on-site. However, this time the routine mammography was covered under Fermilab's Connecticut General medical plan. Approximately 100 female employees, retirees and spouses of male employees and retirees enrolled in the Connecticut General plan took advantage of the convenience of the mobile unit screening. If you are enrolled in the Connecticut General Plan, and were unable to participate in this screening but had a routine mammography done since January 1, 1990, you can submit the bill for payment under the Connecticut General plan. The bill will be processed the same as any other medical claim. Attach the bill to a Connecticut General claim form available from the Benefits Office (WH15SE).

NEW DENTAL PLAN

A new dental plan, CIGNA Dental Care, was added to the benefit package as of March 1, 1990. If you missed the initial open enrollment, you will have another opportunity to consider the new plan next September. The dental open enrollment will coincide with the medical open enrollment.

NEW TIAA RATES

Teachers Insurance & Annuity Association (TIAA) announced new interest rates effective March 1, 1990 — February 28, 1991. Contributions during this period to TIAA Retirement Annuities (RA) will

Benefit Notes Con't.

earn 8.50%. Contributions to TIAA Supplemental Retirement Annuities (SRA) will earn 8.25%. These rates are down from last year's rates of 9.50% (RA) and 9.25% (SRA).

CREF UPDATE

As of March 1, 1990, College Retirement Equity Fund (CREF) stopped deducting an expense charge of .5% from each CREF SRA contribution. Now the only difference between CREF RA contracts and CREF SRA contracts are the cashability and transferability provisions in the SRA contracts.

CREF SRA added two new funds, CREF Social Choice and CREF Bond Market, on March 1, 1990, and URA adopted the new accounts for CREF Retirement Annuity contracts effective April 1, 1990. You can allocate contributions to the new accounts by calling 1-800-842-2252. Be sure that you have your CREF contract number(s) and social security number when you call TIAA-CREF.

Cashability, fixed period pay-out and transferability options were not added to CREF Retirement Annuity (RA) contracts. A letter outlining the reasons for not adopting the options was mailed to all employees' mail stations. Keep in mind that these options are available to you through the CREF Supplemental Retirement Annuity (SRA).

IRS CHANGES

On February 21, 1990, the IRS confirmed that retirement accumulations can be transferred on a tax deferred basis from mutual funds (403(b) 7) to TIAA-CREF SRA (403(b)) contracts. Prior to this confirmation, you were able to only transfer funds from TIAA-CREF SRAs to mutual funds and not the reverse.

The IRS recently issued final regulations defining "hardship withdrawals" from (401 (k)) plans. It is likely that these regulations will also apply to TIAA-CREF SRAs (403 (b)) plans and mutual fund accounts (403 (b) 7) plans. These plans have been administered according to the temporary regulations, and now will be administered according to the final regulations. The next issue of *FermiNews* will include a description of "hardship withdrawal" regulations.

PREFORMANCE REPORTS TO COME

Updated performance illustrations comparing TIAA-CREF and mutual funds will soon be available from the Benefits Office. Watch for the announcement in *FermiNews*. -- Paula Cashin

FERMILAB BASKETBALL LEAGUE: WINTER SEASON 1989-90

The Fermilab Basketball League completed its 6th indoor season with the close of the 1989-90 winter schedule. Participation was strong. The league fielded 6 teams and had a refreshing blend of past veterans and rookies. The season featured spirited competition and good sportsmanship. Bad Co. went undefeated during the regular season with a perfect 13-0 record. They were followed by the Lakers with a 10-3 record, Flatwater 7-6, Stienen Electric 6-7, Capital Services 4-9 and Wappen 0-13.

The first game in round one of the play-offs matched Wappen against Flatwater. The game remained close until **Dave Bulmahn** for Flatwater began to take over. He finished with 20 points, as Flatwater went on to win 57-48. **Jim Kerby** and **Mark Nylund** each scored 11 points for Flatwater. **Casey Hartmann** led Wappen with 15 points and **Dave Brown** added 10. The second game matched Stienen Electric against Capital Services. This game went down to the wire with **Mike Gilley** (19 pts.) and **Dave Smith** (8 pts.) keeping Capital Services in the game. However, Stienen Electric executed better down the stretch to squeak out a 41-39 victory. **Jim Ranson** led Stienen Electric with 12 points and **Drue Wallace** added 11 points.

The second round of the play-offs matched the Lakers against Flatwater, and Bad Co. against Stienen Electric. The game between the Lakers and Flatwater remained close throughout the first half, but the Lakers, aided by the defense of **Lee Scott** and **Cliff Foster** and the scoring trio of **Steve Takach** (19 pts.), **Fred Lewis** (13 pts.) and **Scott Walters** (11 pts.), went on to win 73-46. **Dave Bulmahn** scored 22 points for Flatwater. In the second game, Bad Co. used balanced scoring to defeat Stienen Electric 85-59. **Al Sondgeroth** led all scorers with 19 points, **Gordy Gillespie** had 17 and **Brian Lavoy** added 16 points. **Jim Ranson** led Stienen with 14 points.

The Championship game pitted the Lakers against Bad Co. The game opened with Bad Co. taking an early 14-6 lead led by the shooting of **Gordy Gillespie**. However, the Lakers soon stormed back taking a 25-21 half-time lead made possible by the balanced scoring attacks of **Floyd Sample**, **Larry Spires** and **Steve Takach** and a strong defense. The second half featured an increase in scoring on both sides with **Steve Takach** and **Scott Walters** leading the Lakers and **Tim Tess** scoring for Bad Co. The Lakers opened up a 10 point lead midway through the second half, only to

Members of the Lakers include: (back row, l. to r.), Fred Lewis (Captain), Larry Spires, Steve Takach; (middle row, l. to r.), Lee Scott, Floyd Sample, Tyrone Thomas, Scott Walters; (front row, l. to r.), Cliff Foster, Dave Nickleski. (Not pictured: Les Nakae, Paul Derwent and Pat Mooney.)

see their lead cut to two with about seven minutes to go. The Lakers then started a 9-3 scoring run with fastbreaks by **Fred Lewis** and **Cliff Foster** and an off-balance spinning bank shot by **Larry Spires** to increase their lead to nine late in the game. The Lakers went on to win 64-57 and retained their championship for the second straight year. **Steve Takach** was selected MVP for the champion Lakers.

One side light of the season was the closely contested race for individual scoring honors. Players entered the final three weeks of the regular season with only a few tenths of a point separating the top 3 positions. **Mike Gilley** scored the season high of 38 points in the 12th game, taking the lead, and winning the scoring title. **Gordy Gillespie** was voted the MVP for the regular season and **Dave Bulmahn** was selected the most improved player.

The Summer Fermilab Basketball League is tentatively set to start in early June. Interested persons should contact the Recreation Office at ext. 3126. -- *Jean Guyer and Fred Lewis*

Employee Assistance

Although the Employee Assistance Office and its programs have been in existence at Fermilab since 1980, many employees are not aware of all the services offered by this office. The following article will answer some commonly asked questions about our Employee Assistance Program.

Q. Why is a program like this needed?

A. Progressive employers are providing Employee Assistance Programs to their employees. They are doing it because it's good business to reduce poor employee performance, absenteeism and tardiness. But they are also doing it because they care about the employees. Each of us, regardless of job classification, faces a variety of problems in our daily lives. Usually, we can work them out ourselves. But, sometimes a problem comes along that becomes too much for us to handle. It affects our job performance, our personal happiness, our health and our family. When that happens, we often need professional help to work on the problem. Otherwise, the situation usually gets worse and the consequences are often unpleasant and expensive.

Q. What is an employee assistance program?

A. The Employee Assistance Program is a service for troubled employees to provide confidential assistance with personal problems that may be affecting job performance. The problems may include stress, financial or legal difficulties, family or marital problems or alcohol/drug abuse.

Q. But aren't those private problems? What right does an employer have to interfere with an employee's personal life?

A. Certainly, they are personal problems — until they begin to affect an employee's job performance. The purpose of the program is to prevent that by making confidential assistance available. It is an offer of a helping hand, not an effort to pry.

Q. How does the program work?

A. The E.A.P. is a guidance and referral service. We will help you clarify the situation and work out a solution that provides the specialized help you might need. You may contact the E.A. Office directly, or if your job performance has been affected, your supervisor may refer you.

Q. Who will know if I voluntarily contact Employee Assistance?

A. Confidentiality is assured. All contact with Employee Assistance is private and no record of contact, referral or treatment will be entered in your personnel file.

Q. What is the cost of the program?

A. Employee Assistance does not charge for its service. We help to identify your problem and then direct you to the appropriate professional resource available in the community. Upon referral, any services not covered by insurance will be the employee's responsibility.

Q. Will my job or future promotion be jeopardized by seeking help?

A. No. The service will in no way jeopardize job security or promotional opportunities. However, your job could be in jeopardy if a problem that causes difficulties at work is left unresolved.

Q. Am I obligated to follow the advice offered by the program?

A. Not at all. The purpose is to offer the best advice we can give. You are the one who has to work out the final solution.

Q. How can I get more information regarding services provided by the Employee Assistance Office?

A. For further information regarding E.A.P., contact Eleanor Thomas-Grumbach at ext. 3591.

* In future issues of *FermiNews*, the E.A. Office will run a series of articles submitted by Eleanor Thomas-Grumbach, E.A.P. counselor. Eleanor joined Fermilab in 1988. She has a B.S. in psychology and an M.A. in Human Relations and Business. Prior to joining the Fermilab staff, Eleanor served as a staff sergeant in the U.S. Army, worked as a psychiatric nurse and was clinical director of an outpatient alcoholism program.

Stockroom

TO CLOSE FOR INVENTORY

The Fermilab Stockrooms will be closed for annual inventory on the following schedule:

Wilson Hall Catacombs: closed Friday, May 11. Will re-open Monday, May 14, at 12:30 p.m.

Site 38 Stockroom: closed Monday, May 14 and Tuesday, May 15, all day, both days.

Please plan accordingly. If you have questions or problems, call ext. 3808, the Supply Office.

-- Frank Cesarano
