Benefits Notes

Open Enrollment (Medical Plan Election)

It's that time of year again when employees have an opportunity to choose which medical plan they want for their medical coverage. This year, we offer the Connecticut General Plan, Anchor HMO, Dreyer HMO, HMO Illinois (HAP), and CIGNA HMO. A summary and comparison of the medical options, along with cost, was mailed to employees' mail stations. Employees should review the information with their families.

The HMO representatives are scheduled to meet with employees in Ramsey Auditorium on Monday, September 12, 1988, at 8:00 a.m., 10:00 a.m., 1:00 p.m., and 3:00 p.m. Employees considering an HMO should attend one of these meetings. Spouses are welcome.

Employees that elect a change in medical coverage must complete and submit the appropriate forms to the Benefits Office no later than September 23, 1988. - Paula Cashin

THE SAFETY SECTION

When assessing those factors that contribute to the overall success of Fermilab's research effort, one must always be aware that, in addition to the Fermilab community's dedication and diligence, safety plays a vital role in that success.

Fermilab operations and experiments often require people to work long and sometimes unusual schedules. From time to time, we may also work alone in remote areas. Whenever you are working alone, working irregular hours, or working in a remote area, be sure that a co-worker, supervisor, or colleague is aware of your location and schedule.

Additionally, people who leave personal vehicles or assigned university vehicles on site while traveling should be sure to notify someone at the Lab that they are leaving the vehicle unattended. Vehicles sometimes need to be moved for snow removal or parking-lot improvements. Security has a form which can be used to arrange for long-term vehicle parking while owners/drivers are on Lab business or returning to a home institution.

Thank you for your attention to these important matters. We encourage your continued diligence.

Acclaimed Chicago Pro Musica to Perform at Fermilab

The Grammy Award-winning Chicago Pro Musica made history in 1986 at the National Academy of Recording Arts and Sciences as the only ensemble ever to receive the award for "Best New Classical Artist." This internationally acclaimed ensemble inaugurates the 1988-1989 Fermilab Chamber Music Series on Sunday evening, September 25, 1988, at 7:30 p.m. with works by American and Russian composers.

The virtuoso talents of the musicians of the Chicago Pro Musica will be highlighted in a performance of Stravinsky's landmark Twentieth Century

composition, L'Histoire du Soldat (The Soldier's Tale), with WFMT-FM Radio's Carl Grapentine narrating the familiar fable of the soldier who "lets the devil take his fiddle and call the tune." The Pro Musica will also perform the Chicago-area premieres of two works written especially for the ensemble: The Clarinet in My Mind by University of Illinois Professor Paul Martin Zonn and The Meteln Kassandra by Chicago composer Frank Abbinanti.

The Chicago Pro Musica includes ensemble founder and leader John Bruce Yeh, clarinet; Willard

Elliot, bassoon; George Vosburgh, trumpet and cor- net; Charles Vernon, trombone; Daniel Gingrich, horn; Albert Igolnikov, violin; Joseph Guastafeste, string bass; and James Ross, percussion. They have performed regularly to critical acclaim and en- thusiastic audiences throughout the United States, in nationally-broadcast "live" studio concerts on WFMT-FM Radio, at the Chamber Music Festival at Bahnhof Rolandseck in West Germany, and most recently in Perth, Australia. Carl Grapentine, a WFMT-FM program host since 1986, is also well known as the "voice" of the University of Michigan Marching Band and as a baritone soloist and music director in the Chicago area.

\$11 provides you with admission to this stimulat- ing evening of music in the intimacy of Fermilab's Ramsey Auditorium. Reserve your tickets by com- pleting and returning the attached form with payment and a self-addressed, stamped envelope. For further information or phone reservations, call ext. ARTS weekdays between 10:00 a.m. and 12:00 noon, or 1:00 p.m. and 4:00 p.m. Phone reservations are held for five days, but due to ticket demand, those not paid for within five working days will be released for sale.

In the Library

Transparencies from the "24th International Con- ference on High Energy Physics," held in Munich, Germany, on August 4-10, 1988, are in the Library office and are available for photocopying.
