Dave Kandelberg
Mats Jimbaugh
Paul Hamand - Congratulations!

1613 Magnet ground fault occurred ~ 1430 hrs.
High potting indicates shorted magnets at
1) between E20 E1, upper Bus
2) between E28B, lower Bus
3) at C4 upper/lower Bus - fold back.

High potting crews under G. Ortleb are about
to enter Tunnel for detailed high potting.

Booster is down for what is for the moment an
unknown reason. ~~the~~
The 1600 - 2400 shift would take over if able.
